

Brainstorm solo

Date	10 April 2023
Team ID	NM2023TMID04528
Project Name	Global Co2 Emission
Maximum Marks	5 Marks

Environmental impact of human activity CO2 emission

Sasikala

Non
poisonous
gas

Rise of
global
temperature

Physical
harms to
human

Greenhouse
gases-carbon
dioxide,water
vapour
increases

Human
drive more
cars

Human
exhale CO2

Clean energy.

Public transport.

Control CO2 emission.

Afforestation.

Dhanupriya

Combustion
of carbon

Changes in
weather
patterns

Biochar
200/CO2

Direct
impact on
human
health

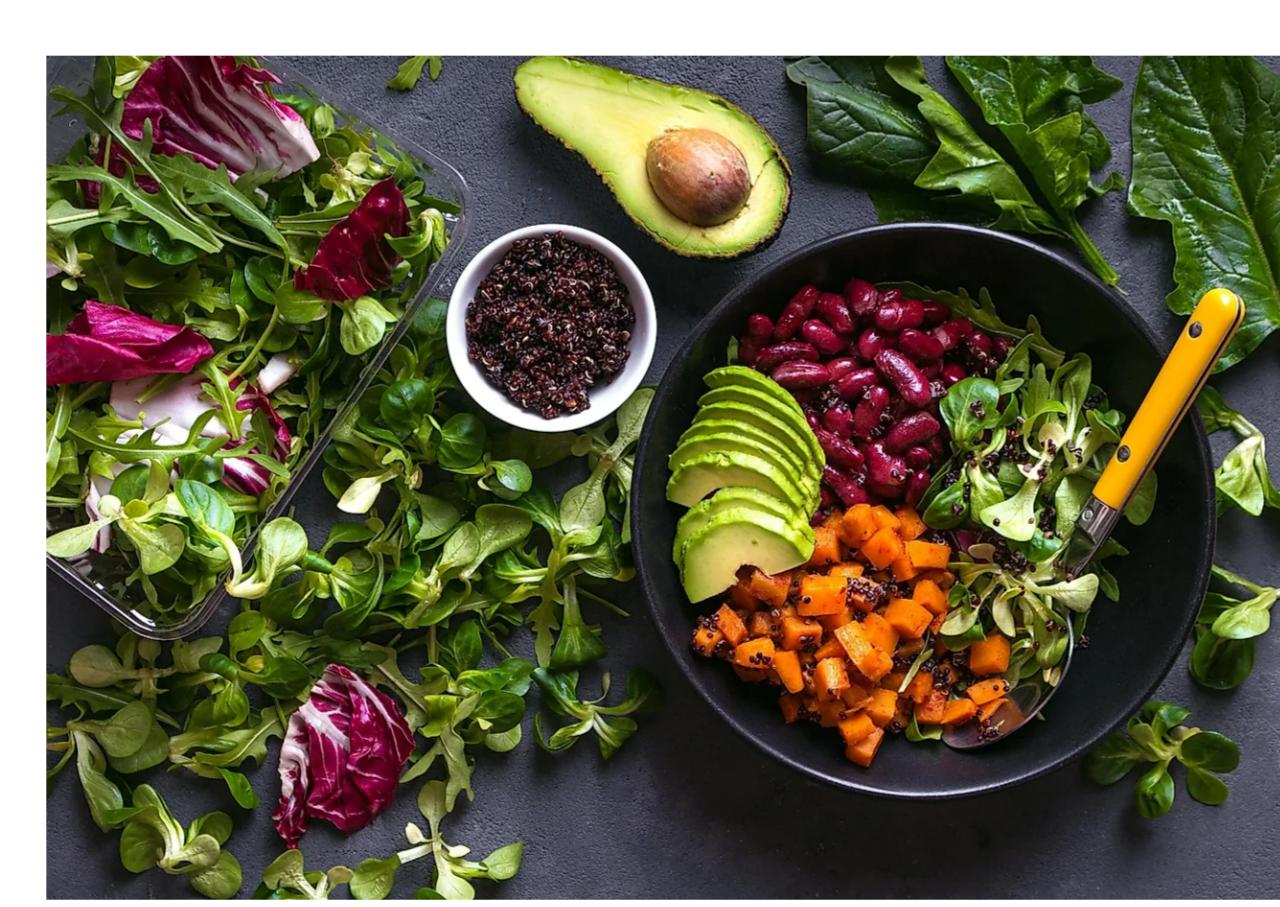

Deforestation

Over population/
Over
consumption

Fluorinated
gases

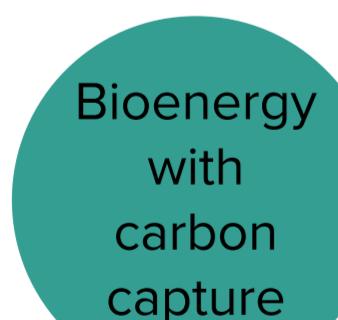

Home energy

Vegan diet..

Battery electric car.

Mangaladeepa

Released
burning
fossil fuel
,coal,oil.

Increase
Sea levels

Human
migration
and conflict

Fertilisers
containing
nitrogen

Human
burn trash

Excess
emissions
of co2

Ecosystem
collapse

Habitat
restoration
100/CO2

Crop failure
farm and
loss

Kasthuri

Plastic
production

Chlorofluoro
carbons(CFCs)

NF3SF6
.bromofluorocarbon
